

# Taxidia, automatically better for business

Global Cash Solutions

There is a significant need for a revolutionary step in improving cash processing efficiency. In cash centres at Central Banks, Commercial Banks and Cash In Transit companies, the outbound cash order processes are rarely automated. Taxidia, in all its flexible configuration possibilities, can automatically produce cash orders consisting of loose banknotes and/or strapped banknotes in both single and multi-currency. This process, which is almost fully automated, results in FTE savings from 50% up to 80%.

# Travelex and GCS, automatically better together

## About Travelex

Travelex is a trusted brand and is a globally experienced banknote outsourcing provider, supplying Travel Money solutions to over 20,000 outlets. We have in-depth knowledge of bank requirements and have unprecedented insight into the market place, economic environment, consumers' requirements and changing habits when it comes to cash automation and FX.

## About GCS

GCS have an in depth knowledge about each and every process that plays a role in the cash cycle, especially cash centre processes. This knowledge, combined with unique hard & software engineering skills and experience in R&D projects, enables us to deliver high quality innovative solutions like Taxidia. By utilising our unique project management methodology & solution approach, GCS has succeeded in bridging the gap between business and technology.

## Great minds, great innovation

Travelex and GCS have partnered together to invest resources, capital and technology to create a unique, innovative solution with scalable flexibility that can adapt to the needs of our partners. The result being a game changer in the industry.

## Automatically better

### Innovative

Travelex along with its key partner Global Cash Solutions (GCS) have invested their resources, technology and capital to create a unique and innovative solution that can also be configured to your specific requirements.

### Configurable

With its modular design, Taxidia can adapt to simple and more complex configurations using single or multi-currency banknotes, either loose or strapped.

### Precise

Taxidia significantly reduces error rates operating to Six Sigma standards.

### Secure

With manual intervention reduced to a minimum and stringent quality, integrity and audit checks, the opportunity for shrinkage is greatly reduced.

### Savings

With much reduced manual handling, staff costs are significantly reduced and can be expected to be from 50-80%.

### Expertise

Travelex, together with GCS has established the genesis of a new generation of cash centre automation.
